

SENIOR CONSULTANT – HEALTH CARE EVALUATION AND DATA SECURITY

Job description

Reporting to:	Director/ Associate Director	Department:	Consulting
Location:	XXXX	Direct reports:	Consultant (s)

Overall job purpose

PACEC consulting merged with RSM in 2017. RSM is a leading provider of audit, tax and consulting services to public and private sector clients. The firm operates internationally with 3,500 partners and staff in the UK and access to more than 41,400 people in over 120 countries across the RSM network.

RSM PACEC remain a dedicated team with offices in Belfast and Cambridge focused on Research, Evaluation and Data Analysis. Work is growing significantly, with recent wins of varying sizes jobs up to £2M. This presents exciting career opportunities for experienced Consultants/ Managers to join a team of professionals focused on working together to deliver real value to clients.

Opportunities exist for Senior Consultants/Managers with health research/consulting expertise in programme and policy evaluation. In particular experienced in analysing health data and / or information security in particular ensuring patient data is secure.

Responsibilities:

- The post holder will support delivery of the Evaluation of the Digital Diabetes programme for NHSE/PHE over the next 12 months, with a focus on data analysis and ideally information security. Leading on from this, the work is expected to involve more of the same for other health related clients.
- The post holder will be expected to maintain RSM's high level of service and values, taking responsibility for ensuring timely delivery of client work plans, and other additional duties that may be required. This will include having commercial acumen to deliver work on time, to quality and cost.
- The post holder will have personal objectives, a career development plan and individual performance targets to achieve as part of this role, which will be subject to periodic review and feedback via your line manager.
- The post holder will work with RSM colleagues to devise and implement a business development plan, making best use of RSM Marketing and Business Development resources, in order to raise awareness of RSM's services.
- The post holder will prepare quality proposal responses in line with tender specifications in a timely and robust manner, and as agreed with your line manager.

- 
- The post holder will work to build client relationships and achieve client testimonials for the delivery of high quality work.
 - The post holder will work with colleagues across the Research, Evaluation and Analytics team to identify further opportunities for growth and support the implementation of those agreed.
 - The post holder will mentor and coach junior staff as required, seeking to support the team and learning ethos that currently exists.

The essential requirements

- A strong academic record with numerical proficiency (minimum of 2.1 Honours Degree);
- Previous research/consulting experience (strong focus on data and information security/ governance) ;
- Recent experience of winning and delivering Research and Data Analysis projects
- Experience of working with public sector clients such as Government Departments, NHS, PHE, Health Foundation, Health Trusts etc.
- Excellent spoken and written communication, including experience of presenting complex ideas clearly and concisely to senior client teams;
- Demonstrable experience of the delivery of high quality reports;
- Excellent project management skills, including project planning and budget management;
- Ability to meet deadlines in a client / quality focused environment;
- High proficiency in MS Office including MS Office, Excel, PowerPoint
- Relevant training and experience in Data Protection/ Info Governance

RSM Offer

RSM provide an attractive remuneration package with benefits. Also available is training/ development and career planning. Finally RSM PACEC prides itself on its team working ethos and on growing the business to support career development/
